

# Service, repairs, manufacturing, installation & commissioning of:

- safety valves
- armatures
- drives
- containers
- pumps
- spare parts service
- dispensing systems
- blowers & compressors
- wastewater treatment equipment
- explosion-protection equipment
- measurement and control systems

As a DIN EN ISO 9001:2008 and an SCC-certified company, we provide installation, repair and other plant engineering component services in our own workshops and on site at your premises.

We are authorised to repair, adjust and seal safety valves. We are allowed to carry out repairs to components and plants which are subject to the German Explosion Protection Regulations (authorised repairs according to ATEX). We are also an authorised dealer as defined by the German Water Resources Act.

Current certificates can be found on our website:

[www.mehner-gmbh.de](http://www.mehner-gmbh.de)

Support is provided by:

- **Dekra Certification GmbH**

Authorised repairs according to ATEX

# Wolfgang Mehner GmbH

As a family-owned and managed company Wolfgang Mehner GmbH is synonymous for products, spare parts and services. Our team will be pleased to assist you in your industry work with its wide-ranging expertise and experience.

As a systems partner, our activities are not restricted to any one manufacturer or manufacturers and include advice, supplying and commissioning industrial equipment and a wide range of spare parts and services in this field. We have many years of experience in developing individual solutions.

Our "all-day, every-day, all-year" customer service and a comprehensively-stocked warehouse are all a matter of course to us. Our wide range of products enables us to help you reduce the number of your suppliers, including B and C product management.

Our efficient performance is backed up for your benefit by various certifications which can be currently viewed at [www.mehner-gmbh.de](http://www.mehner-gmbh.de).

We offer you a wide range of services to help you organise and improve your company's operational processes. In doing so, we focus on optimising your use of energy and resources. We look at challenges from all perspectives; in doing so, we create added value for our customers. Benefit from the expertise of our qualified technical specialists who keep up with the latest industry developments all the time.

Here is a list of industries which often call on our services:

- automotive manufacturers and suppliers
- wood, paper and cellulose industry
- chemicals industry
- medical products, foodstuffs and luxury foods industries
- utilities and waste disposal industries
- mechanical and plant engineering industry
- trade and export sector

As a systems partner, we combine offers and supplies for these industries from many international manufacturers with our rich store of experience. This gives you access to a wide range and selection of products with minimal effort.

Our job-specific advice enables you to access the best solutions to your technical problems because we have only one objective – your success.

## Here is a list of some of our partners:

## We are a company with special sales and service agreements.

We are: the officially-authorized dealer / sales and service partner of:

We are an authorized specialist for the repair of safety-valves made by:

## Armatures

- |                            |                              |
|----------------------------|------------------------------|
| shut-off valves & fittings | regulating valves & fittings |
| butterfly valves           | compensators                 |
| sluice valves              | solenoid valves              |
| diaphragm valves           | dirt pans                    |
| ball valves                | filters                      |
| steam traps                | check valves                 |
| safety valves              | plastic valves               |
| pressure-reducing valves   | membranes                    |

## Drives

- electric
- pneumatic
- hand-operated

## Measuring Equipment

- |                                   |                       |
|-----------------------------------|-----------------------|
| pressure-measurement equipment    | analytic equipment    |
| temperature-measurement equipment | boiler equipment      |
| flow-meter equipment              | regulating electrodes |
| level-gauges                      | accessories           |

## Pumps

- standard pumps
- block pumps
- inline pumps
- submersible motor-driven pumps
- metering pumps
- vacuum pumps
- drum/barrel pumps

- pneumatic diaphragm pumps
- eccentric spiral pumps
- booster pumps
- rotary piston blowers
- stirring equipment
- switching equipment
- accessories

## Containers and Systems

- |                               |                        |
|-------------------------------|------------------------|
| diaphragm containers          | metering systems       |
| storage tanks                 | booster equipment      |
| special containers            | waste water systems    |
| degassing systems             | dirt filtering systems |
| clean steam-generators        | heat-exchanger systems |
| condensate recovery equipment | accessories            |
